

# RL5000<sup>XP</sup>

RL5000<sup>XP</sup>  
with high-  
topper

## *An affordable ATM with the versatility to enhance your cardholder's experience.*

Triton's PC platform RL5000<sup>XP</sup> is changing the way people think about ATMs. The all-new model offers a stunning 10.4 inch LCD display and supports a long list of value-added transactions. All at a much lower price point than other PC-based machines.

Furthermore, Triton's Prism™ ATM software provides financial institutions with a simple HTML interface for customized screen content.

This revolutionary configuration offers vendor independence through the XFS specification and makes possible a long list of revenue generating value-added services.

But what makes the Triton RL5000<sup>XP</sup> most popular with banks and credit unions is that it meets all regulatory requirements at half the cost. The PC-based RL5000<sup>XP</sup> includes a Visa Encrypting PIN Pad (VEPP) and Triple DES compliance.

In addition to its low price, the RL5000<sup>XP</sup> also offers an extremely low cost of operation. The wide range of dispensers available offers customers the ability to choose the capacity that most matches their usage.

There's not another PC ATM on the market that offers the level of performance and cost-competitiveness delivered by the Triton RL5000<sup>XP</sup>. The future of ATMs is here.
